Dear Sir,

1) I noticed your name mentioned in N. Y. Times; you are publishing "Whitewash IV." Enclosed is schematic drawing showing the impossible pirouettes of the "magic" Bullet. In 1968 when I sent this sketch to Garrison (N. Orl.) in 68 in an open letter, couple days later - I received a tel. call recommending me to get out of my home which would be blown up in 2 hours. Still standing. Last Sept. 12 I sent the enclosed sketch to FBI c/o the President by certified mail asking technical explaination of the ballistics I never got an answere. I have your first paper back book.

2) By the end of the WW2 a gestapo spy (S. E.) and his gang were apprehended in this country. He (and his brother) were members of a prominent greek shipping family. This affaire is supposed to be declassified last July.

When I made a request to FBI c/o the Attorney General, my request was denied – I am not a registered historian. S. E. spying For Nazi germany has expected a geman victory and expected a reward: a position of a greek Quisling. In 41 he want to Cuba to pick up a german girl-spy and flew back To U.S. via S. Am. Apparently it was a large organisation. Could be interesting material For a book or movie. I got off a From that gang but reported to U.S. authority. My pay-off For a swindle by gestapo in 1938/39 in Europe.

Please drop me a note acknowledging the reception of this letter.

Very truly Yours

N. Rotiker
